

DEFINE CUSTOMER- FACING PROBLEM STATEMENT

Fataplus Presentation

1. Define Problem Statement

As discussed,
we've utilized
Amazon's template
to define the
problem statement
for Fataplus:

As discussed,
we've utilized
Amazon's template
to define the
problem statement
for Fataplus:

Today, farmers and stakeholders in the agribusiness and agritourism sector in Madagascar face the challenge of struggling to receive government tender offers for environmental projects, limiting their access to these valuable opportunities. These individuals need a streamlined and effective platform to facilitate the receipt and response to government tender offers.

2. Market Research

Customer Segment:
Farmers and
stakeholders in the
agribusiness and
agritourism sector
in Madagascar.

Market Analysis:

1. Current Landscape:
Understand the current
state of agribusiness and
agritourism in Madagascar.
Identify key players,
existing platforms, and
government initiatives
related to environmental
projects.

2. Challenges Faced:
Identify the specific challenges that farmers and stakeholders encounter in accessing and responding to government tender offers for environmental projects.

3. Opportunities: Explore potential growth areas and untapped opportunities within the agribusiness and agritourism sector. This could include emerging technologies, market trends, and unmet needs.

4. Regulatory Environment:
Familiarize yourself with the regulatory framework governing environmental projects and agribusiness activities in Madagascar. This includes compliance requirements and any incentives provided by the government.

5. Market Research:
Conduct thorough market research to identify potential buyers, distributors, and competitors in the agribusiness sector. Understand market trends, consumer preferences, and pricing structures.

5. Competitor Analysis:
Analyze existing platforms
or services that aim to
address similar challenges.
Understand their strengths,
weaknesses, and areas
where Fataplus can
provide a unique value
proposition.

6. Customer Feedback:
Gather insights directly from farmers and stakeholders through surveys or interviews. Understand their pain points, preferences, and what features or functionalities they value most in a solution like Fataplus.

3. Stakeholder Engagement and Insights

To address Amazon's question about understanding the different stakeholders in the ecosystem, we've identified key stakeholders and outlined steps to engage with them:

- Farmers:
Primary users of
the platform,
directly involved
in agricultural
activities.

- Government
and NGO:
Entities issuing
tender offers for
environmental
projects.

- Agritourism
Operators:
Businesses
promoting
tourism related
to agriculture.

- Agricultural Associations and Cooperatives: Representing the interests of farmers.

- Exporters and Distributors: Companies involved in the export of agricultural products.

Engagement Steps:

- Conduct Interviews and Surveys with representatives from each stakeholder group.

- Participate in Industry Events related to agribusiness and agritourism in Madagascar.

Gathering Insights:

- Document
Feedback: Take
detailed notes
during interviews
and surveys.

- Analyze

Trends: Identify
recurring issues
or opportunities
from the
feedback.

Validation of Assumptions:

- Compare gathered insights with initial assumptions about stakeholder challenges.

Incorporating Insights:

- Use the gathered insights to refine features, functionalities, and approach of the Fataplus platform to directly address stakeholder needs.

By actively engaging with and listening to various stakeholders in the agribusiness and agritourism ecosystem in Madagascar, we aim to gain a deeper understanding of their perspectives and create a solution that truly meets their needs. This user-centric approach will increase the likelihood of success for the Fataplus project.

Thank you for your guidance and support. We look forward to presenting our progress during the upcoming workshops.
