Professional Summary

Innovative UX/UI Designer and Digital Innovation Specialist with over 5 years of experience transforming digital experiences across public sector, economic development, and creative industries. Founder of Madagascar's first product design agency specializing in agritech innovation. Proven track record in leading design teams, developing comprehensive design systems, and driving digital transformation initiatives that enhance user experience and accessibility.

Expert in bridging the gap between user needs and business objectives, delivering intuitive design solutions that improve engagement, efficiency, and digital inclusion. Passionate about mentoring emerging designers and advancing the design community in Africa through education and strategic partnerships.

Core Competencies
